data-to-video displays

Here is a general purpose one-line video message generator, that with options accepts a variety of inputs . . . including coded BCD or ASCII . . . for numeric, alpha, or alpha-numeric displays. • FIXED MESSAGE • SELECTABLE MESSAGES • COMPUTER READOUT • TIMING, SENSING, AND MEASUREMENT READOUT.

Character sizes selectable in 6 steps, 18 to 144 scan-lines high. Up to 16 alpha-numeric character displays. Internal video mixer. Adjustable display position. Compatible with various raster-scan rates (525, 625, 675, 837, 875, 925, 1023).

Sample display applications: pollution control sensor readout—space range/timing data—video source identification—video/data test records—IRIG time readout—SMPTE time readout.

For complete data call (301) 948-0460 or write: 15932 Shady Grove Road, Gaithersburg, MD 20760.
